

SDS Mechanical & Automation (A Division of Southern Design Services, Inc.) is currently looking for a highly skilled and experienced **Senior Industrial Electrician** to join our team.

The ideal candidate will have extensive knowledge and hands-on experience in installing, maintaining, and repairing electrical systems in an industrial setting. This role requires a deep understanding of electrical engineering principles, the ability to read & interpret blueprints, and a commitment to safety & quality.

The Senior Industrial Electrician will be responsible for troubleshooting complex electrical issues, performing preventive maintenance, and ensuring compliance with all relevant codes and regulations.

This position demands excellent problem-solving skills, attention to detail, and the ability to work independently as well as part of a team.

The successful candidate will also be expected to mentor junior electricians, provide technical guidance, and contribute to continuous improvement initiatives. If you are a dedicated professional with a passion for industrial electrical systems and a track record of excellence, we encourage you to apply.

Job Responsibilities:

- Install, maintain, and repair electrical systems in industrial settings.
- Troubleshoot and resolve complex electrical issues.
- Perform preventive maintenance on electrical equipment.
- Ensure compliance with electrical codes and safety regulations.
- Read and interpret blueprints, schematics, and technical drawings.
- Mentor and provide technical guidance to junior electricians.

- Collaborate with other team members and departments.
- Maintain accurate records of work performed and materials used.
- Conduct regular inspections of electrical systems and equipment.
- Participate in continuous improvement initiatives.
- Respond to emergency electrical issues promptly.
- Test electrical systems and components to ensure proper functioning.
- Install and configure electrical control systems.
- Work with programmable logic controllers (PLCs) and other automation systems.
- Ensure all work is performed to the highest quality standards.

Desired Requirements:

- High school diploma or equivalent; technical degree preferred.
- Journeyman or Master Electrician license.
- Minimum of 10 years of experience in industrial electrical work.
- Strong knowledge of electrical codes and regulations.
- Proficiency in reading and interpreting blueprints and schematics.
- Experience with PLCs and automation systems.
- Excellent problem-solving and troubleshooting skills.
- Strong attention to detail and commitment to quality.
- Ability to work independently and as part of a team.

- Good communication and interpersonal skills.
- Physical ability to perform the duties of the job, including lifting and climbing.
- Valid driver's license and reliable transportation.
- Willingness to work flexible hours, including overtime and weekends.
- Strong organizational and time management skills.
- Commitment to safety and continuous improvement.
